

Индивидуальный проект. Этап 4

Бешкуров Тимофей - студент группы НФИбд-01-21
19.05.2022

Добавление ссылок на литературные
источники. Создание постов.

Цель работы

Добавить к сайту ссылки на литературные источники.

Сделать 2 поста: по прошедшей неделе и на тему “Создание презентации”

Выполнение лабораторной работы

1. Зарегистрироваться на 8 ресурсах ресурсах (рис. 1)

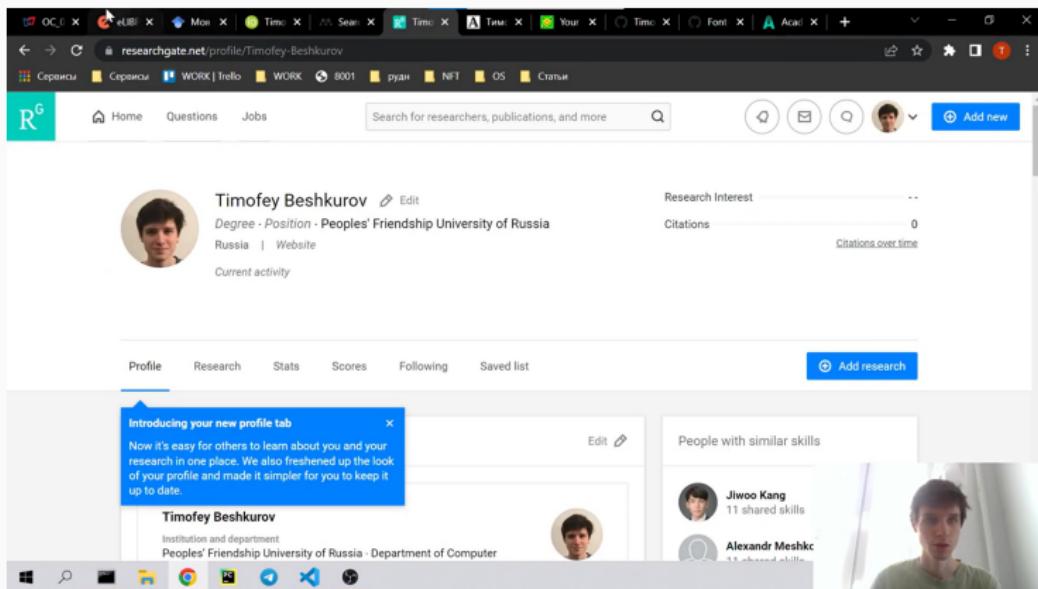

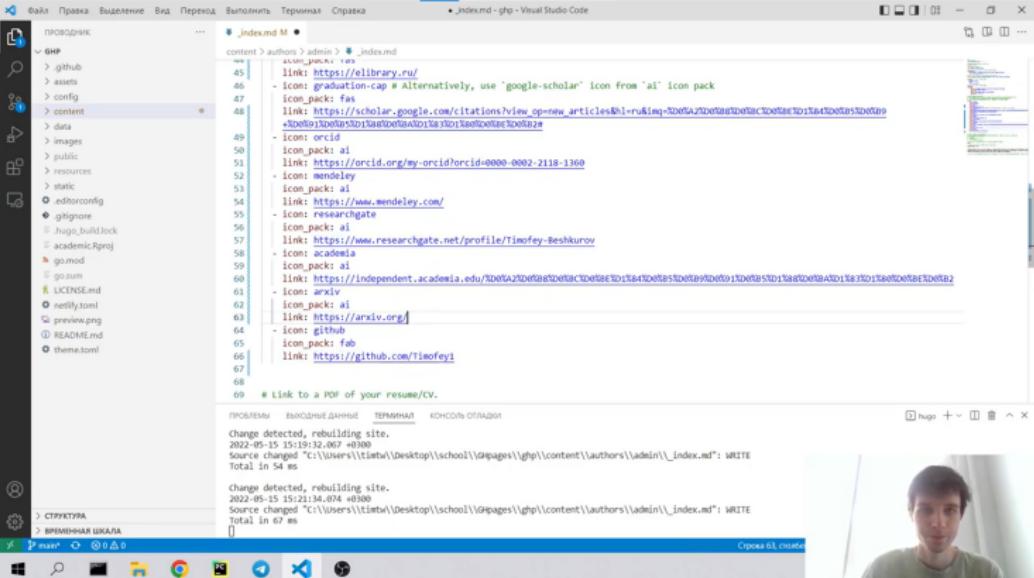

Рис. 1: Регистрация

2. В ./content/authors/admin/_index.md добавить иконки ресурсов и ссылки (рис. 2).

The screenshot shows the Visual Studio Code interface with the file `_index.md` open. The code contains several lines of YAML front matter and a list of resources. The resources are defined using the `content` key, which includes URLs, icons from various packs, and descriptions. A note at the bottom encourages linking to a PDF resume.

```

4. Сделать пост по прошедшей неделе. (рис. 4)

The screenshot shows a Windows desktop environment. In the foreground, a Visual Studio Code window is open, displaying an MD file named `index.md`. The code editor shows the following content:

```
content > post > 091505 > indexmd > # My review of the week
1
2  # Documentation: https://wochekey.com/docs/managing-content/
3
4  title: "Week 09.05-15.05"
5  subtitle: "Week 09.05-15.05"
6  summary: "Latest news"

15  # Featured image
16  # To use, add an image named "featured.jpg/png" to your page's folder.
17  # Focal points: Smart, Center, TopLeft, Top, TopRight, Left, Right, BottomLeft, Bottom, BottomRight.
18  image:
19    caption: ""
20    focal_point: ""
21    preview_only: false
22
23  # Projects (optional).
24  # Associate this post with one or more of your projects.
25  # Simply enter your project's folder or file name without extension.
26  # E.g. projects = ["internal-project"] references "content/project/deep-learning/index.md".
27  # Otherwise, set .projects = [].

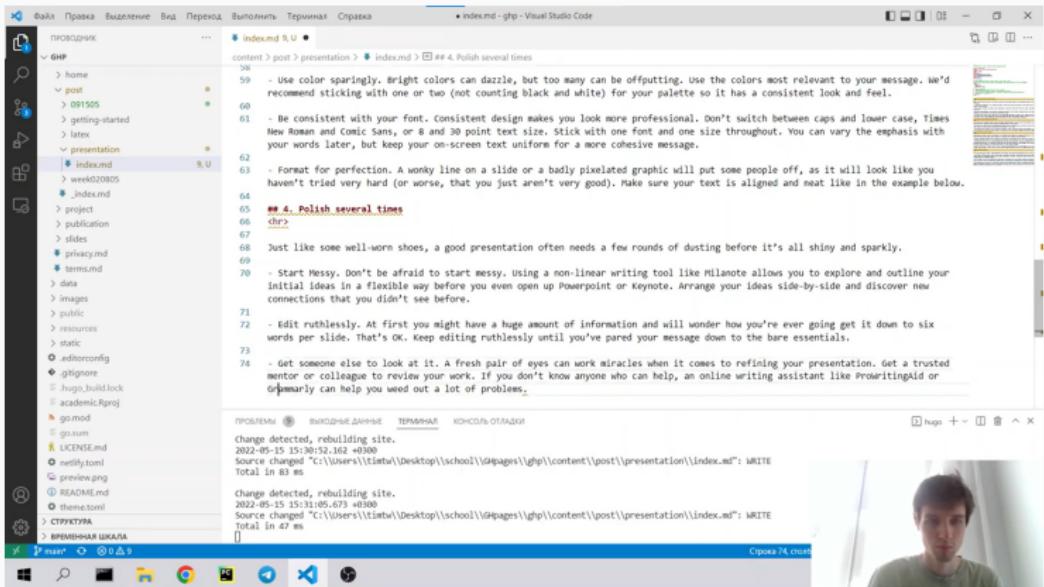

```

Below the code editor, the terminal window shows the command `hugo new post/091505` being run, followed by the output: "hugo: collected modules in 79 ms" and "content dir: C:\Users\timow\Desktop\school\ghpages\gh\content\post\091505 created".

In the background, a video call interface is visible, showing a person's face in a video feed.

Рис. 4: Пост

5. Добавить пост на тему: Создание презентации (рис. 5)

The screenshot shows a Windows desktop environment with Visual Studio Code open. The code editor displays a file named `index.md` containing a post about presentation creation. The terminal at the bottom shows the command `hugo` being run, indicating the site is being rebuilt. A video player window is visible on the right side of the screen, showing a young man speaking.

```
content > post > presentation > index.md > ## 4. Polish several times
59 - Use color sparingly. Bright colors can dazzle, but too many can be offputting. Use the colors most relevant to your message. We'd recommend sticking with one or two (not counting black and white) for your palette so it has a consistent look and feel.
60
61 - Be consistent with your font. Consistent design makes you look more professional. Don't switch between caps and lower case, Times New Roman and Comic Sans, or 8 and 30 point text size. Stick with one font and one size throughout. You can vary the emphasis with your words later, but keep your on-screen text uniform for a more cohesive message.
62
63 - Format for perfection. A wonky line on a slide or a badly pixelated graphic will put some people off, as it will look like you haven't tried very hard (or worse, that you just aren't very good). Make sure your text is aligned and neat like in the example below.
64
65 ## 4. Polish several times
66 chrx
67
68 Just like some well-worn shoes, a good presentation often needs a few rounds of dusting before it's all shiny and sparkly.
69
70 - Start messy. Don't be afraid to start messy. Using a non-linear writing tool like Milanote allows you to explore and outline your initial ideas in a flexible way before you even open up Powerpoint or Keynote. Arrange your ideas side-by-side and discover new connections that you didn't see before.
71
72 - Edit ruthlessly. At first you might have a huge amount of information and will wonder how you're ever going to get it down to six words per slide. That's OK. Keep editing ruthlessly until you've pared your message down to the bare essentials.
73
74 - Get someone else to look at it. A fresh pair of eyes can work miracles when it comes to refining your presentation. Get a trusted mentor or colleague to review your work, if you don't know anyone who can help, an online writing assistant like ProofwritingAid or Grammarly can help you weed out a lot of problems.
